

GO KART

Built in the same structure style as the go carts of years ago, with a foot break and accelerator system built to replicate an original go kart, the Urban X electric go kart has been built with a high tensile steel frame to ensure it withstands the roughest crashes.

Reaching speeds of up to fifteen kilometers per hour*, and fitted with two x 12 volt 7 AH batteries, the Urban X go kart motor is 200 electric watts, and will leave your friends for dust! The capacity of the battery will allow most drivers to ride for up to 50 minutes (subject to the drivers weight), and is suitable for riders aged 8 plus.

*Please note that the maximum speed of Urban X vehicles varies and is subject to regions and countries individual legal requirements.

Key Features

- High tensile steel frame
- Adjustable frame to suit individual driver's heights
- Easy to use hand brake
